

DON'T LET THIS HAPPEN TO YOU

INTRODUCING THE LEADER IN TOWABLE SAFETY TECHNOLOGY THE TUSON DIRECLINK BRAKE CONTROL & TUSON SWAY CONTROL

Unique Low Speed Brake Adjustment

This allows for the proper amount of braking for both highway and in-town driving.

Links with your Tow Vehicle's Network Computer

uses multiple data parameters in a proprietary way to create amazingly proportional trailer braking.

Most Advanced Proportional Brake Controller & Diagnostic Tool

Plugs directly into your tow vehicle's computer network, automatically configuring to your tow vehicle and trailer's brake system. DireLink maintains complete situational awareness because it continuously monitors your tow vehicle's computer network.

.....

• Most Intelligent sway control
Utilizes independent left and right side braking

• Fastest Activation Reaction Time

• Greater Stability Control
Keeps trailer tracking centered behind the tow vehicle

• Better than Mechanical Sway Control
hitches at reducing sway during large sway events

• Works with the major truck OEMs
GM, Ford, Dodge, Toyota, Nissan & Others
Integrated brake controllers & aftermarket brake controllers

• Maintenance & Adjustment Free
Auto adjusts to improve braking effectiveness, even detects off-road towing conditions

• Minimal Speed Loss
We don't slow you down while counteracting sway

• Two Year Limited Warranty
